PRECAST / PRESTRESSED CONCRETE PRODUCTS

Transportation

Concrete Products for Transportation

Flexicore of Texas provides prestressed concrete products for the transportation sector. Whether your needs are for private, municipal, county or state, Flexicore of Texas can meet your needs. Our dedicated sales staff will work with you through design, bidding, drawing submittal, and final delivery.

Our production facility is TXDOT and ODOT certified . We are staffed by Prestressed / Precast Concrete Institute (PCI) and American Concrete Institute (ACI) certified quality assurance personnel. Our materials are certified at point of origin, tested during manufacturing, and available for record review. Pre-pour, post-pour, and pre-shipment inspections show our level of commitment to quality control.

Our transportation products include, but are not limited to: Prestressed Concrete Pile, Box Beams, Slab Beams, X Beams, Deck Slabs, Precast Caps, and Precast / Prestressed Concrete Deck Panels.

Industrial

Concrete Products for Industry

In the heart of the oil and gas industry, Flexicore of Texas stands as one of the leading producers of precast / prestressed concrete products servicing the multiple refineries along the Gulf Coast. Many of the worlds largest producers of chemicals and refined oils trust Flexicore of Texas to manufacture high quality precast products for their facilities.

Over our 60 year history, Flexicore of Texas has not only provided products designed by our industry partners. We have also revolutionized the use of precast and / or prestressed products for the industrial market. Whether by redesign from cast-in-place or being a trusted advisor in the engineering design process, Flexicore delivers.

Call us today to find out how we can assist you with your design, quotation, and manufacturing of precast / prestressed concrete products.

DESIGN CONSULTATION

Flexicore of Texas teams with engineering experts to design the products we build. Our engineering partners are leaders in the precast / prestressed industry.

OUTSTANDING SERVICE

With over 60 years of proven customer service, Flexicore of Texas consistently delivers on time and on budget . We will do everything we can to make sure your project is finished and delivered on your schedule.

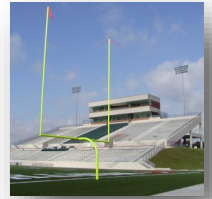

QUALITY COMMITMENT

At Flexicore of Texas, the quality of our work is paramount. Simply put, if it's not right, it will not be shipped.

Commercial Construction

Commercial Concrete Products

In 1964, the Houston Astrodome was being constructed. The desire was for precast concrete risers to house all the needed seating, and Flexicore of Texas was there to answer the call. Since 1953, Flexicore of Texas has furnished the commercial and specialty precast concrete market showing our diversity and know-how.

Whether you are building a stadium, a new office building, or a custom home, Flexicore of Texas will help you every step of the way. If you already have a design or need us to help you create one, we are here to assist. With our dedicated professionals and years of experience, we will manufacture your precast / prestressed products to exacting specifications.

Fireproofing

Fire Protection

Flexicore of Texas is one of the largest suppliers of shop applied concrete fireproofing in the country. Our list of clients includes almost every chemical and refining company, as well as numerous engineering and construction companies. We fireproof products manufactured as box or contour sections using either light weight or normal weight concrete.

As times change and new technologies emerge, Flexicore of Texas has advanced as well. Along with our standard shop applied concrete, we also are able to provide an Industrial Cementitious Spray-Applied Fire Resistive Material (SFRM) . This material not only provides heat resistance, but is also lighter in weight than traditional concrete fire protection.

Flexicore of Texas has provided fireproofed material in conjunction with almost every major steel supplier in the nation. Whether your job is large or small, we can offer competitive pricing and unequalled service.

Flexicore of Texas was established in 1953 in Houston, Texas under a philosophy of being large enough to serve, yet small enough to care. Our comprehensive quality control programs are consistently compliant with TXDOT and numerous other government and private sector agencies.

We offer many products custom-designed to meet your business needs and are one of the country's premier manufacturers of prestressed / precast concrete . Flexicore of Texas continues to be managed by a highly responsive team of motivated employees who provide a wealth of construction and engineering knowledge.
